

ONE TREND **BANKRUPTING** BABY BOOMERS' RETIREMENTS IN 2013

Not all is as it seems. We are teetering on the edge of an abyss. There's a fuse box buried deep within the U.S. economy... and it's about to blow. When it does, the lights on the economy's promising future will go black.

Major banks (once thought "too big to fail") will be shaken to the ground. Corporate bankruptcies will soar. Bonds will crash. The Dow will plummet.

The dollar will continue its slide into the void of monetary history. You need to prepare right NOW to protect your existing retirement account from being vaporized.

This isn't mere fiction. Deep in the shadows of the real economy lies an underground economy... where the world's biggest financial players conduct secret transactions worth trillions of dollars. These transactions are made far away from the headlines of the evening news. You'll seldom read about them in the Wall Street Journal... and you'll rarely hear about them from your bank or portfolio manager — yet they affect every investment you make: your stocks, your bonds, your mutual funds — even your real estate.

Cyprus and New Zealand's governments recently considered seizing up to 10 percent of depositors' savings to fund big bank bailouts. It's only a matter of time before U.S. officials consider making citizens liable for the ever-increasing and out-of-control debt that has reached record heights of over sixteen trillion.

What does this mean to you? If you have worked hard all of your life and managed to put away a nest egg, you might end up losing most of your retirement savings because you think everything is fine. Truth is, the federal government is lying to you.

METALS!**

THE GREAT AMERICAN "ECONOMIC RECOVERY FACTS"

Out-of-control spending has left us with a debt of over \$16 trillion while the U.S. pays \$73.9 million to China every day to cover interest on debt.

A desperate Federal Reserve has been trying to artificially boost the economy by dumping billions of newly printed dollars into the Treasury bond market with no end in sight.

Crushing taxes and regulations have made it even more difficult to start and grow a successful business, forcing many companies to move their employees and operations out of the country.

The Eurozone crisis is set to cause global economic collapse as European countries like Spain, Greece, Cyprus and others struggle under the weight of sovereign debt issues.

THE GREAT AMERICAN ESCAPE

With the Federal Reserve printing more money than anytime in the United States history, the forecast for the economy is uncertain. Will the U.S. be another Cyprus? Will this current administration look to fund our ever increasing debt by taking over your existing retirement accounts? Ronald Reagan said it best, *"The government's view of the economy could be summed up in a few short phrases: If it moves, tax it. If it keeps moving, regulate it. And if it stops moving, subsidize it."* In these uncertain times the best thing to do is prepare for the worst and hope for the best.

Savvy investors all around the U.S. are properly protecting their retirement accounts by moving into physical precious metals you can control and can physically hold in your hands tax-free without any penalties within your existing retirement account. If you want to protect your existing IRA or 401(k) with physical precious metals, the company that we strongly recommend is Regal Assets. As a leader in the precious metals industry, Regal Assets has attracted the support and business of prominent media and television figures — and has a 99.9% customer satisfaction rating. Stop waiting for things to change. Take control of your future and move your existing retirement account into physical precious metals today.
